
Kei Duke-Bergman

M.Sc. Student in Computer Science

Uppsala & Stockholm · LinkedIn

Profile

I am an engineering student majoring in Computer Science at KTH. My areas of specialization are real-time 3D graphics and interaction, and I often work with novel interaction interfaces. In addition to my studies, I enjoy developing video games and producing interactive art installations that use technology to come to life.

Education

M.Sc in Interactive Media Technology

Aug 2024 - Present

KTH

My master's education is centered on graphics, interaction and user experience, combining low-level programming and the deeply technical with the human aspect and theories of interaction.

Highlights:

- Made a game in Unity3D, developing 3D models and working with mesh deformation.
- Developed a quiz website in React which, using API calls to both Spotify and Gemini, converts Spotify playlists into music quizzes, and then allows multiple users to play through the music quizzes together from their own phones in real time (similar to Kahoot).

Freestanding course, Creative Writing

Aug 2023 - January 2024

Södertörns Högskola

B.Sc in Computer Science

Aug 2020 - June 2023

KTH

During my first three years at KTH, I studied a significant amount of programming, mathematics, and some graphics.

Highlights:

- Developed a ray tracer and a rasterizer using C++ and the SDL API. Experimented with shading and indirect lighting.
- Mathematically simulated different phenomena in Unity3D, such as fluid simulation, spring-mass systems and boids.

Awards and Grants

NAVET Student Festival

2025

KTH & Tekniska Museet

I and a team of three other students were accepted into NAVET, a joint project between Tekniska Museet and KTH. We were granted 15000kr to create an interactive display piece at the museum.

Winner of Jame Gam #27

2023

Skills

Languages

- Swedish ■■■■
- English ■■■■
- Japanese ■■■□
- French ■■□□

Software

- Unity3D ■■■■
- Godot ■■■■
- Visual Studio ■■■■
- Git ■■■□
- Cmake ■■■□

Programming Languages, APIs and frameworks

- C# ■■■■
- Java ■■■■
- HTML ■■■■
- Javascript ■■■■
- CSS ■■■■
- C++ ■■■□
- C ■■■□
- LaTeX ■■■□
  (with which this CV was made)
- Go ■■□□
- React ■■□□
- Python ■■□□
- OpenGL ■□□□
- CUDA ■□□□

Organizational

- Planning ■■■□
- Leadership ■■■□
- Budgeting ■■■□

Misc

- Music Production ■■■□
- Lindy-hop ■■□□

Jame Gam

I competed in a 48-hour game jam called Jame Gam and won the award for overall best game.

Work Experience

Teamleader

Oct 2024 - Aug 2025

Tekniska Museet

I oversaw day-to-day operation of the entire museum of technology during every other weekend.

Museum Educator

Sep 2023 - Aug 2025

Tekniska Museet

I held showings of exhibitions, experiment shows, and worked with the 3D space visualization tool OpenSpace to facilitate awe and learning in children and adults alike.

Teaching Assistant

Jan 2022 - Apr 2022

KTH

I was a teaching assistant in the IS1200 course which focuses on low-level coding in C and (MIPS-)Assembly. The course also handles computer components and hardware in detail.

Laboratory Assistant

Jan 2020 - June 2020

Atlas Copco

I worked with the modernization of the two R&D labs at Atlas Copco's headquarters. One of my main achievements was a status screen visualizing the current testing status of the equipment in the lab.

Voluntary work

Head of Lyrics

Jul 2022 - Jul 2023

METAspexet

My role as Head of Lyrics meant I led the Lyrics group in providing the text for all songs in METAspexet's annual musical production.

Head of Set Production

Jul 2022 - Jul 2023

METAspexet

In my role as Head of Set Production I was responsible for leading the Set Production for METAspexet's annual musical production.

Chairman of the Study Board

Jul 2021 - Jun 2022

Konglig Datasektionen

As Chairman of the Study Board, I led the Computer Science Chapter's study board in reviewing and evaluating courses at KTH.
